ABOUT ME

A **Full-Stack Web Developer** with expertise in **Laravel, WordPress, Shopify, Magento 2, and API integration**. I specialize in building **scalable, high-performance web applications** and e-commerce solutions tailored to business needs.
With extensive experience in **custom website development, theme & plugin customization, API development, and cloud services**, I ensure that every project is **optimized for performance, security, and user experience**. My focus is on delivering **trend-focused, high-quality solutions** while maintaining **clear communication** and meeting deadlines. Whether it's a **custom e-commerce store, API integration, or a complex web application**, I bring a **results-driven approach** to every project. Let's collaborate to create something impactful!

PROJECTS

Chat-bot Management Admin Panel - PHP Laravel

Developed an admin panel for managing a chat-bot system using Laravel. The panel allows administrators to monitor and configure chat-bot interactions, manage user queries, and update chat-bot responses. Focused on creating an intuitive interface for easy management, ensuring secure access control, and optimizing the backend for efficient chatbot operations.

Admin Panel Development - PHP Laravel Application

Developed a fully functional admin panel for a website using Laravel. The panel includes features for managing users, content, and site settings, providing a seamless and intuitive interface for administrators. Focused on ensuring secure access control, data integrity, and efficient management of the website's backend operations.

Weather App - Javascript Development & API Integration

Personal Project
- Designed and developed a dynamic Weather App using JavaScript to fetch and display real-time weather data via the OpenWeatherMap API.
- Implemented asynchronous programming with **async/await** for efficient data retrieval and error handling.
- Built a responsive user interface with interactive input validation for a seamless user experience.
- Extracted and displayed key weather metrics, including **temperature, humidity, visibility, wind speed, and pressure**, with dynamic icon integration.
- Integrated robust error-handling mechanisms to provide meaningful feedback for invalid city entries or connectivity issues.

Medical Equipment Selling Website - Laravel Development

Global Swap Traders | Lahore
- Developed a small business website for exporting medical equipment, ensuring a **visually appealing and user-friendly** interface.

- Designed and implemented the **UI, landing page, About Us, Contact Us**, and various **product category pages** to effectively showcase all products.
- Enabled **direct user communication** via **email and WhatsApp** for seamless inquiries and purchases.
- Implemented category-based product filtering, allowing users to browse products efficiently.
- Ensured the website is **fully responsive, fast-loading, and easy to navigate**, providing an optimal experience across all devices.

WORK EXPERIENCE

WEB APPLICATION DEVELOPER PAPERMAKER.PK

Role: Full-Stack Developer (Freelance)
Designed and developed the entire frontend, creating a visually appealing and user-friendly interface using JavaScript, Bootstrap, and Laravel Blade templates. Collaborated on backend development as a junior developer, contributing to core functionality and API integrations using PHP and Laravel. Implemented responsive design principles to ensure optimal performance across various devices, enhancing user experience. Delivered a high-performing, fast, and intuitive website, which successfully launched and remains active with positive user feedback. Focused on crafting a seamless UI/UX, balancing aesthetics and functionality.

WEB DEVELOPER SOLVEFREE.COM

Web Developer (Full-Stack Developer)
SolveFree.com, Remote
As a Web Developer at SolveFree.com, I build and optimize responsive, user-friendly interfaces for a platform that provides various free calculators. I focus on enhancing UI/UX using HTML, CSS, JavaScript, and Bootstrap while collaborating with the backend team to integrate APIs and manage data flow with PHP and Laravel. My goal is to deliver fast, visually appealing, and seamless user experiences.
- Developed and maintained a responsive web interface using HTML, CSS, JavaScript, and Bootstrap, ensuring an intuitive user experience.
- Optimized front-end performance for faster load times and smoother interactions.
- Implemented on-page SEO strategies to enhance search engine visibility and user engagement.
- Designed the website layout and UI elements, aligning them with brand identity to improve aesthetics and usability.

EDUCATION AND TRAINING

Lahore, Pakistan
BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY University Of The Punjab

Graduated with a **Bachelor's in Information Technology** (BS-IT) from the University of the Punjab, Lahore, where I gained expertise in software development, database management, networking, and cyber-security. My coursework included web development, requirements engineering, programming (C++, Java, **PHP**, **JavaScript**), cloud computing, and IT project management. I also worked on hands-on projects that enhanced my problem-solving and technical skills.
Related subjects:
1. *Object-Oriented Programming (OOP)* – Core for building maintainable backend systems.
2. *Data Structures and Algorithms* – Ensures optimized, efficient, and performant code.
3. *Software Engineering* – Guides the full development lifecycle, from design to deployment.
4. *Database Systems* – Essential for designing, querying, and managing databases.
5. *Software Requirements Engineering* – Gathering and analyzing client requirements effectively.
6. *Web Technologies* – Foundation for frontend and backend web development.
7. *Project Management* – Key for handling projects efficiently as a freelancer or team member.

HONOURS AND AWARDS

07/2024
IT Specialist - JavaScript – Certiport

The **IT Specialist - JavaScript** certification by **Certiport** validates a developer's expertise in JavaScript programming fundamentals, including syntax, data structures, DOM manipulation, and event handling. This certification demonstrates proficiency in:
⬚ Core JavaScript Concepts – Variables, data types, operators, and control structures.
⬚ Functions & Objects – Defining, invoking, and working with objects and methods.
⬚ DOM Manipulation – Selecting, modifying, and updating HTML elements dynamically.
⬚ Event Handling – Responding to user interactions with efficient event listeners.
⬚ Debugging & Troubleshooting – Identifying and fixing JavaScript errors. Earning this certification showcases a strong foundation in JavaScript and the ability to build interactive, dynamic web applications
